

SuperSeal™ 20WB FAQ's

- Green alternative to Solvent based stain
- Very Low VOC content (>90g. per liter)
- Excellent Water Resistance
- Exceptionally Non-Yellowing
- Low odor
- Matte finish
- Coverage: 300-400 sq. ft. per gallon
- Always pre-condition polymer to ambient temperature

Question: What is the preferred method of application for SuperSeal™ 20WB?

Answer: Use a low pressure sprayer, short nap roller or lamb's wool applicator to apply Superseal™ 20WB to the substrate. It is crucial not to over apply the material or to allow pooling, as this may lead to undesirable results such as whitening.

Question: Can I use Superseal™ 20WB on surfaces other than concrete?

Answer: SuperSeal™ 20WB may be applied to many porous surfaces including, stone, brick, manufactured stone, overlays and many types of tile. We recommend you apply sealer to a small section of the substrate to ensure proper adhesion.

Question: Is SuperSeal™ 20WB UV Stable?

Answer: SuperSeal™ 20WB is UV stable and a perfect choice for interior and exterior application.
